SUBJECT INDEX, VOLUME 53

Adrenal cortex
and effect of intravenous glucose on response to cold, 98
and effect of type and quantity of food on response to cold, 106
and response of normal and alloxan-treated rats to cold, 12
and steroid diabetes in guinea pig, 423
assay of potency by trauma, with shock, in rats, 345
compensatory atrophy not prevented by methylandrostenediol in monkey, 242
extract, cortisone and hydrocortisone in relation to work performance in adrenalectomized-eviscerate rats, 581
function in relation to liver vitamin content, 447
influence on fasting ketosis during cold stress, 410
influence on removal on effect of steroids on oxidation of proline by kidney, 261
maternal and fetal interrelationships of, in rats, 182
oxygen consumption by various cortical zones after hypophysectomy, DDD treatment, and trauma, 541
relationship to diabetogenic effect of ethylenediamine in partially depancreatized rats, 30
Adrenal perfusion
transformation products after epiandrosterone, 245
cholesterol synthesis by tumorous gland from child, 506
Adrenalectomy and regrowth of hair in rat, 326
Adrenalin—see epinephrine
Androgen effect on comb in inbred brown leghorns, 512
Alloxan
and adrenal response to cold, 12
influence of DDD on course of Alloxan diabetes in rat, 116

Bio-assay
chick comb response to androgen in inbred brown leghorns, 512
of adrenocortical potency by trauma, with shock, in rats, 345
of follicle stimulating hormone, 604
of estrogens in chick by oral administration, 301
of relaxin, 391

Corticotropin
effect on Islets of Langerhans in rat, 252
its extra-adrenal effect on work performance in hypophysectomized rats, 24
need of calcium for stimulation of adrenal *in vitro* by, 687
Cortisone
absorption and glycogenic activity in comparison to hydrocortisone after parenteral administration, 73
and steroid diabetes in guinea pig, 423
and work performance in adrenalectomized-eviscerate rat, 582
effect on glycogen deposition in different skeletal muscles, 226, 480
failure to influence thyroid function, 239
induced diuresis in adrenalectomized dogs with ascites, 653
metabolism in liver slices in relation to ascorbic acid, 441
Corticosteroids
factors affecting *in vitro* metabolism by liver tissue, 617
in vivo metabolism of 21-desoxycortisone, 267
metabolism of, in perfused rat liver, 202

Diethyldithiocarbamate and other agents in relation to obese-hyperglycemic syndrome in mice, 572

Ectocervix content of protein nitrogen and nucleic acid, 487

Endocrine influences on renal compensatory hypertrophy, 436
Endometrium metabolism as influenced by menstrual cycle, 667
Epinephrine
depletion in cat suprarenal gland by insulin, 536
effect on glycogen reserves and respiration, 37
effect on white blood cells in normal, hypophysectomized and splenectomized guinea pigs, 293
induced glycogen depletion in different skeletal muscles as effected by testosterone and cortisone, 480
mechanism of effect on plasma potassium, 564
Estradiol dipropionate, reproductive performance after single injection prepuberally, 342
Estrogens
assay in chick by oral administration, 301
estradiol effect on glycogen deposition in different skeletal muscles, 226
measurement of mixtures of, by fluorometry, 527
the metabolic pattern of C^{14} diethylstilbestrol, 163
reproductive performance after single prepuberal injection of estradiol dipropionate, 342
Estronase in human and rodent tissues, 321
Estrous cycle
effect of uterine distention on, 1

Follicle stimulating hormone assay based on augmentation with human chorionic gonadotropin, 604

Glucose in crocodilia, 311
Gonadotrophins in human pregnancy urine, qualitative changes during period of increasing titer, 674
Growth hormone
diabetogenic action of different preparations of, 114
effect in dogs, 134
effect on anemia of hypophysectomy, 235
effect on Islets of Langerhans in rat, 252
effect on nucleic acid content of chick embryo, 520
effects in diabetic dogs, 549
modification of choline deficiency syndrome, 661
Hydrocortisone
adsorption and glycogenic activity as compared to cortisone after parenteral administration, 73
and work performance of adrenalectomized-eviscerate rat, 582
further observations on hypertensive properties in rat, 633
in vivo metabolism of, 88
modification of choline deficiency syndrome, 661
Hypophysis
ablation anemia compared with that produced by removing thyroid and adrenal, 465
effect of growth hormone on anemia caused by removal of, 235
effect of removal on fetal and placental growth in rats, 198
effect of removal on oxygen consumption by various zones in adrenal cortex, 541
effect of removal on renal compensatory hypertrophy, 436
effect of removal on white blood cell picture, 293
gonadotropin content in postmenopausal women, 455
influence of removal on effect of steroids on oxidation of proline by kidney, 261
intermedin and melanin synthesis, 458
response to propylthiouracil in presence of hypothalamic lesions, 274
storage and release of gonadotropin in pregnant mouse, 367
Hypothalamus
effect of progesterone in persistent estrus caused by lesions in, 380
pituitary response to propylthiouracil in presence of lesions in, 274

Intermedin and melanin synthesis, 458
Insulin and epinephrine effect on plasma potassium, 564
Iodine
influence of cortisone on plasma protein bound iodine response to TSH, 60
effect of cortisone on thyroidal and renal metabolism of, 171

Mammary gland
effect of ovarian hormones on mammary response to prolactin, 17
Methylandrostenediol
and production of hypertension, nephrosclerosis, and cardiac lesions, 492
effect on compensatory atrophy of adrenal gland in monkeys, 242

Obese-hyperglycemic syndrome in mice, studies of, 572

Pancreas
effect of extracts on ketone body production by rat liver, 192
Pituitary gland—see, hypophysis
Progesterone
in peripheral blood of rabbit, pre-ovulatory, 79
effect of 11-keto, 11α-hydroxy-, and 11β-hydroxyprogesterone upon glycosuria of partially depancreatized rat, 221
effect on persistent estrus in rats bearing hypothalamic lesions, 380
state in placental tissues, 599
Propylthiouracil
and pituitary response in presence of hypothalamic lesions, 274
effect on radioiodide concentrating by thyroid in normal and hypophysectomized rat, 332
Pseudopregnancy
as influenced by decidual tissue, 216

Relaxin
assay using mouse symphysis, 391
comparison of response of mouse and guinea pig pubic symphysis to, 403
sources in rabbit, 593

Testis metabolism of carbohydrate in rats fed nitrofurans, 585
Testosterone
effect on glycogen deposition in different skeletal muscles, 480
effect on incorporation of glycine-1-C^{14} into protein in liver slices, 306
Thyroid gland
activity as influenced by thermal burns, 451
and metabolism of endogenously labeled thyroid hormone, 50
and plasma protein-bound iodine after thyroxine treatment, 358
effect of anesthetic agents on function of, 630
electron microscopic observations of, 123
function not altered by cortisone, 239
propylthiouracil effect on radioiodide concentrating ability of, 332
Thyrotropin
effect on epithelial percentage and nuclear volume determinations in thyroid tissue, 474
effect of cortisone on plasma protein-bound iodine response to, in hypophysectomized dogs, 60
purification by ion exchange chromatography, 640

Unsaturated compounds in human urine, 238
